

HOW TO: Download iPod Compatible Audio Books to a Mac

If you are using a Mac to download and listen to your iPod compatible audio books, there are a few extra steps that you will need to follow.

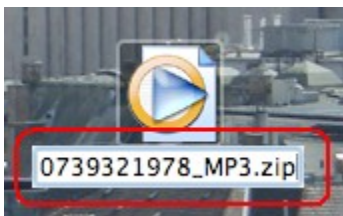

Once you have clicked the green download button, you will need to choose to SAVE the file to your computer. Please save the file to a location you can easily remember.

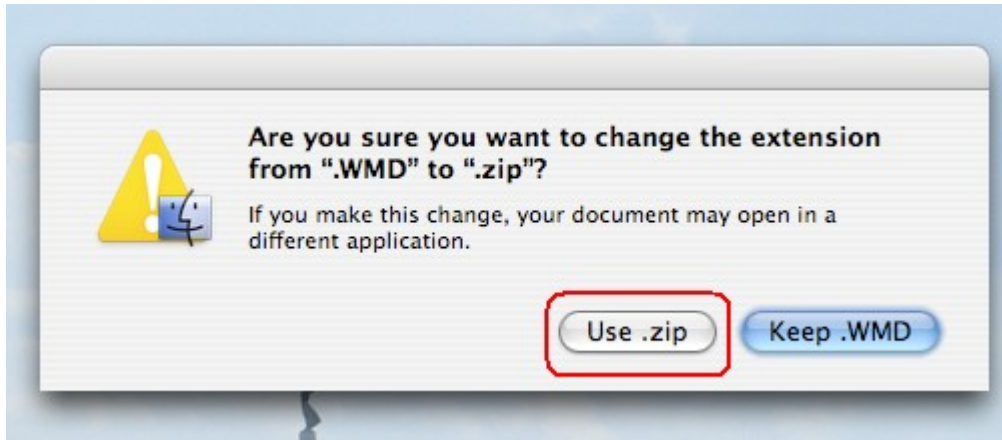

Once the download is complete, you will need to rename the file from a .wmd file to a .zip file.

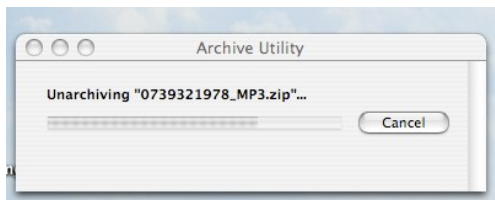

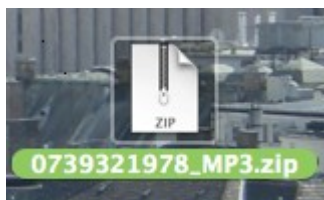

To do this, click on the file to select it, and click once just on the file name – this will allow you to edit it. Remove the .wmd extension from the end and replace it with .zip. For example the file Happy.wmd should be renamed to Happy.zip.

You may be prompted to confirm that you want to change the file to a .zip file. Please choose Use .Zip.

Next, click on the new .zip file to open it with Auto Archive.

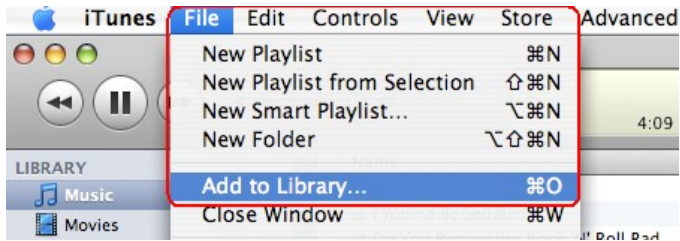

This will save the file as a .zip file and create a new folder for you with the all the files for the audio book.

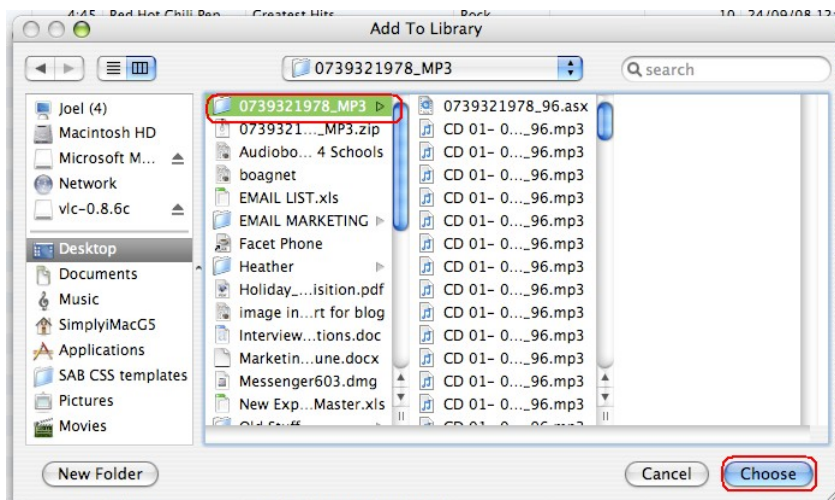

If you do not have an Auto Archive program, please go to the website address below to download Winrar:

<http://www.rarlab.com/download.htm>

Once the file is finished archiving, open iTunes, click on the File tab and choose Add to Library.

Next choose to add the new folder that auto archive extracted.

This should see you through the download process and allow you to use your iPod compatible title.

The screenshot displays the iTunes application window. On the left, the sidebar shows the 'LIBRARY' section with categories like Music, Movies, TV Shows, Podcasts, Radio, and Ringtones. Below this are 'STORE' (iTunes Store, Purchased) and 'PLAYLISTS' (Party Shuffle, 90s Music, Music Videos, My Top Rated, Recently Added, Recently Played, 80s, Carole King - Tapestry, Corky 1, Corky 2). A 'Selected Item' section is visible at the bottom left of the sidebar.

The main area shows a table of music tracks:
